

M-DRIVE

M-DRIVE is MIMIC's proprietary, plug and play device that streamlines the way imaging centers or non-health care organizations upload and transmit medical images to the cloud.

**Secure & Encrypted
Uploads**

**Reliable Performance
Minimal Footprint**

Multi-Site Support

MEET MIMIC

MIMIC is a **low-cost, cloud-based PACS system** that enables medical imaging centers and non-healthcare organizations to store, access, and share diagnostic images securely and efficiently.

-  Cloud Based Image Storage
-  Real-time remote access
-  Patient & Physician Portals
-  Scalable pricing model
-  Industry leading onboarding
-  Support help included

INDUSTRIES WE SERVE

Designed to **adapt to the unique needs** of every sector we serve. Here's how each industry benefits from our flexible, secure, and scalable solution.

Radiology Imaging Centers

Scalable storage for high volumes.
Automated imaging workflow.
Reduced IT and server maintenance.

Specialty Medical Practices

Fast image sharing with referring physicians.
Streamlined patient portals for image access.

Legal Services

Rapid access to injury-related imaging.
HIPAA-compliant image storage and sharing.

Schools & Universities

Supports academic programs.
Easy sharing of anonymized datasets for study.

Governmental Entities

Secure compliant storage for public health imaging.
Efficient coordination across departments/sites.

Clinical Research Trials

Designed for teams managing complex imaging data across clinical trials—reliable cloud storage, remote access, and custom workflows.

CLOUD IMAGING STORAGE CENTER

Your PACS, Our Storage

Tired of overpriced storage fees? Show us your storage bill and we guarantee to beat it!

Use **MIMIC** as a standalone, secure imaging archive to **reduce costs and expand access.**
